

Learning Dashboard
Unleashing the Power of Data and Innovation To Improve Learning

Our services

We will work with you to define and implement a repeatable process for us to receive source files, update Learning Dashboard Tableau package and delivery the package to you.

We will work with you to adjust/customize the Tableau package for your business needs.

We can also help you to define and implement a process to retrieve source data from your LMS and HR system.

Learning Dashboard

An interactive learning data analysis package to help HR, Talent, and Learning Professionals understand what learning is being consumed by employees.

The Learning Dashboard package, data included, will be built in Tableau Desktop. You will use Tableau Reader, which is a free desktop application, to open, view and interact with visualizations built in the package. There is no software/tool/license to purchase on your end.

Please visit <http://www.tableausoftware.com/products/reader> for further information about Tableau Reader.

A Repeatable Process

- 1. You provide data**
 Each reporting period, you will provide three predefined source files:
 - Learner metadata – contain all employee information
 - Learning Activity metadata – contain all learning activity information
 - Transcript – contain all transcript data for all learners
- 2. We build Tableau Package**
 We will transform the source files into 'data sources' for the Tableau package, and update the package for the current reporting period with the new data sources.

- 3. You consume Tableau Package**
 You will receive a Tableau package containing great learning business insights that can be opened, viewed and interacted within Tableau Reader, and can be shared with as many as needed.

Key Features

- **No cost for software**
- **No or minimum initial investment with the standard package**
- **Visual Analysis**
- **Interactive**
- **Historical Data/comparison**
- **Business Insights in one package**
- **Repeatable process**
- **Flexible– easy to expand to include other critical business insights**
- **Easy customization**
- **Easy to share**
